# 1949 PRICE-LIST

1882  
1949

**67th**  
**Year**

Camellia

## FOREWORD

**I**T IS our custom, and a pleasant one, to speak to our friends each year through the medium of this price-list. We enjoy telling you about the new items we list as well as those we have stocked for many years.

Our Roses have never been finer. We are proud to send them to you under the tag of Glen Saint Mary Nurseries. Other states grow Roses but we stoutly maintain that our **FLORIDA GROWN ROSES** can and do hold their own against all comers. Try them and see what we mean.

A beautiful garden can be accomplished with far less time and expense than you realize. Do you have in mind a spot which needs a special plant to lift it out of the commonplace? We suggest Cleysera Japonica or Feijoa or Viburnum for that situation. And for a plant which will give added charm and distinction to your garden, choose the Camellia Japonica. Look through our list and make your selections, perhaps from those we are now introducing.

For over a half century we have been supplying home and grove owners with fruit and nut trees for their plantings. Have you tried our Grapevines, either the Muscadine or Bunch type, or our fine Persimmons, Pecans and Citrus trees? There is still time to order these for this season's planting.

Careful attention is given to mail order customers. You may order with assurance of getting quality stock, grown true to name and expertly packed for delivery. If you call at our Nursery, there will be courteous and experienced employees to help you make your selections. And by all means don't forget to look in the Greenhouses when you visit us. You'll enjoy the experience.

We are interested in your success with the products we sell and value your goodwill. If you find something wrong with our materials or service, please tell us about it—and by the same token if you are pleased, let us know that, too. We have built our reputation on satisfied customers and their helpful suggestions will, as always, be welcome. Our grateful thanks to you all—for the past and in anticipation of the future.

# Glen Saint Mary Nurseries Co.

## Glen Saint Mary, Florida

TELEPHONE, Glen Saint Mary No. 2

# TERMS OF BUSINESS

## LOCATION

General Office and Nurseries at Glen Saint Mary, Baker County, Florida, on Seaboard Air Line Railway, and State Road No. 1, 30 miles west of Jacksonville. Office and Citrus Nurseries at Winter Haven, Polk County, Florida. The office is not open for business Sundays, and during the summer we are closed on Saturday afternoons. We recognize most national holidays, such as Fourth of July, Labor Day, Thanksgiving, Christmas, New Year, etc. Visitors who come to the Nursery in disregard of this notice are welcome to look around, but must not expect the help of a salesman or to have plants dug.

## APPLYING PRICES

Orders for five (5), fifty (50), and five hundred (500) plants of one class command the 10, 100, and 1000 rates respectively. Prices herein are for the Retail trade only and cancel all previous lists and catalogues. They are based on current conditions and therefore subject to change without notice.

## CASH

or satisfactory reference must accompany all orders for immediate shipment unless the person ordering has an account. On orders booked in advance of the shipping season, 25 per cent down, with the balance due when the shipping season opens, will be required. Reserve orders are accepted only upon condition that they shall be void should injury befall the stock before shipment, from any cause not under our control. Stock held in our fields on reserve long enough to grow to a larger grade will be billed accordingly at shipping time.

## OUR PRICES

do not include transportation costs. Be sure to state clearly when ordering how you wish shipment made—by Parcel Post, Express, Commercial Truckline or Freight. Lacking this information, we will use our best judgment as to method of forwarding. On orders for shipment by Parcel Post, *add 25 per cent to total amount of order* to cover cost of packing and postage. Unused balance of remittance, if any, will be refunded when invoice is mailed. Heavy shipments that would be expensive by Express can usually travel via Commercial Truckline nearly as quickly as by Express, and for less cost. Please use our order blanks; additional ones will be mailed on request.

## SHIPPING AND PLANTING SEASON

From the middle of November to April for bare-root plants covers the average season, but weather conditions each year govern beginning and ending dates. Balled and Burlapped plants and trees may be safely moved almost every month of the year.

## SUBSTITUTION

It is our desire to furnish stock exactly as ordered, but in case varieties are exhausted, please state definitely on your order blank or in your letter if you wish us to substitute. Otherwise, shipment will be made short without substitution.

## GUARANTEE

We guarantee our stock to be well grown, true to name, properly packed, and shipped according to instructions. In no case shall our liability be more than the original invoice value. There shall be no nursery stock sold under a guarantee to live, except with the understanding that, if it dies, it will be replaced *as soon as possible*, at not less than 50% of purchase price. Claims for replacement must be made in writing within three months after receipt of plants.

## CLAIMS

If, by any possibility, errors should occur, they will be promptly rectified, if claim is made within 10 days after the receipt of goods. Our responsibility, except as stated above, ceases upon delivery of nursery stock in good condition to public carrier.

## WEeping WILLOW. *Salix babylonica*

Bare-root.	Each
3 to 4 ft.....	\$1 00
4 to 5 ft.....	1 25

## WHITE JUDAS TREE. *Cercis canadensis alba*

Bare-root.	Each	10
2 to 3 ft.....	\$2 00	\$18 50
3 to 4 ft.....	2 65	25 00
4 to 6 ft.....	3 65	34 50

B&B, double above prices.

## GLEN AIR-DRIED PEAT

We are fortunate in having one of the finest deposits of pure Sedge Peat in this part of the country. Analysis as determined by commercial chemists, Thornton & Co., of Tampa, Florida, is as follows:

Available Phosphoric Acid....	0.04%
Insoluble Phosphoric Acid....	0.03%
Total Phosphoric Acid.....	0.07%
Nitrogen.....	1.05%
Equivalent to Ammonia.....	1.28%
pH Value..	4.90 (Neutral is 7)

A report from the U. S. D. A., Bureau of Plant Industry, Washington, D. C. to whom we sent samples of Glen Peat, reads in part: "The material is exceptionally uniform in texture, composition and reaction. It consists of fibrous material derived from rootlets and underground stems of sedges and several grasslike plants. Plant remains from Sawgrass are not abundant however, and organic material from Sphagnum mosses is not present. The reaction is acid pH 4.5 to 5.0."

Moisture retention ratio, 4.26 to 1. This means that Glen Peat will hold, when fully saturated with water, more than four times its own dry weight.

## WHAT TO DO WITH IT

Use it for lawns, both old and new—incorporated in the soil when building new lawns, or as top dressing at least once a year on established grass.

Use it to build up humus content of light soils and to improve their moisture-holding capacity.

Use it as a mulch wherever one is indicated, but particularly for acid-loving plants such as AZALEAS, CAMELLIAS, MOUNTAIN LAUREL, GARDENIAS, HOLLY, MAGNOLIA, TEA PLANTS, NANDINA and others.

Use it thoroughly mixed with the soil in planting AZALEAS and CAMELLIAS; its acid reaction will help keep these plants in the best possible condition.

Price in sacks.....\$1.00 per 100 lbs.

If larger quantities or truckloads are desired, write us for quotations. Minimum order shipped, 100 pounds.

## PRICE SCHEDULE:

For varieties where prices are not given, use the first set of prices listed thereafter.

# CONIFEROUS EVERGREENS

### BEST WE KNOW— RELiance AZALEA AND CAMELLIA FERTILIZER

In response to many requests of our customers, we are happy to offer this scientifically blended plant-food for the acid-loving plants. We recommend at least two applications a year—more if the soil is very light. A RELIANCE booklet entitled *Azaleas and Camellias* is available here on request. It gives a lot of good information about these plants and suggestions for their care.
